

Luxury upholstery option for the S-21 Outbound (kit and factory built)

After considerable design and testing we have a luxury seat upholstery option for the S-21. Specifically, what this option offers over other aftermarket choices are as follows:

- Extended seat bottom length. This offers more leg support and closes the gap the stock seat has when set at the furthest aft location.
- The additional support was designed to not increase the seat height, therefore no loss in headroom.
- Ease of adjustment. Like the stock seat this option does not hamper seat adjustment like other aftermarket options.
- Control stick clearance is a non-issue.
- Headrest is thicker and aligns with seat back cushion.
- Perforated for extra comfort, especially on hot days.
- Firmer, more durable foam.
- Lighter than the other after-market options.
- Made of stain resistant, breathable 100% polyurethane
- and virgin vinyl.

The upholstery slips over the frame and secures when closing the zipper and fits perfect over the stock seat frame needing no modification. For installation instructions refer to the instructional video posted on our website.
